

Please make a copy of this document and include this in your GitHub repository for your submission, using the tag #AndroidDevChallenge

Tell us what your idea is.

This application helps the blind to see everything around them by putting the phone up and everything in front of you is described by voice through the application.

Tell us how you plan on bringing it to life.

-
1. *Think ideas.*
 2. *Planning.*
 3. *Research ML libraries to integrate to the app.*
 4. *Design UI.*
 5. *Code.*
 6. *Practical use.*
 7. *Bring it to the community.*

Tell us about you.

I'm Phat Duong. I'm a mobile developer, I have approximately 2 years with Android. I want to make helpful things to bring it to the community. With the knowledge I gained after 2 years of work and the accumulated experience, I hope to make something useful for the community.

Next steps.

-
- Be sure to include this cover letter in your GitHub repository

- Your GitHub repository should be tagged #AndroidDevChallenge
- Don't forget to include other items in your GitHub repository to help us evaluate your submission; you can include prior projects you've worked on, sample code you've already built for this project, or anything else you think could be helpful in evaluating your concept and your ability to build it
- **[The final step is to fill out this form to officially submit your proposal.](#)**
